

Creating a Reel

Find YouTube service (usually under “Live” for chhccathedralnz

Download service -put URL into <https://en1.y2mate.is/mB5k/>

Click download – I use highest resolution (720p)

IGNORE ANY NEW PAGE THAT OPENS

Open the video of the service with Quicktime Player

[if the video is online, download by putting the URL into a website like

<https://en1.y2mate.is/mB5k/>

Click download – I use highest resolution (720p)

IGNORE ANY NEW PAGE THAT OPENS]

Find piece of the service you want to use

I find edit>split clip the fastest

Delete section not wanted; repeat on the other side of chosen clip

File>export as> ... name & 720p

Drag result into photos on laptop

Sync with phone

On phone

Open Instagram Account

Select “Reel”

Upload clip

Next

Next

Click square smiley at top of screen

Clip captions (can be edited) Done; next

Can edit “cover”

Add caption

Can include tinyurl.com pointing to the whole video

Share

Can “add to story” by clicking dart on the bottom of screen

Share to facebook

[or download video with captions using a website on phone & upload to facebook & share to stories]
